Missouri City, Texas 77459

Dear Steve,

I very much appreciate the luncheon hosted by John Nau and you. I believe the concept on which TRUTH is based is sound and important to our community and beyond. To provide an opportunity for clergy of different faiths in our community to travel together to some countries where creating and maintaining inter-religious or inter-ethnic peaceful co-existence has been a great challenge, could be of benefit to all who seek to maintain and enhance the high quality of such relationships in our community. We have done as well as we have in our great city because of the efforts of different segments of the clergy and business community. (I am hopeful that the group will be expanded to include members of the Greater Houston Partnership).

I realize that it is important to focus this program on the younger leaders in our city, but I am willing to serve on an Advisory Committee and to endorse the program with all my heart and mind.

Thanks to you and John Nau for taking the lead.

Warm personal regards,

*Samuel E. Karff*
